

Arjun Desai

Software Development Engineer

Bengaluru, India | +91 96789 01234 | arjun.desai.sde@gmail.com | linkedin.com/in/arjundesai-sde

PROFESSIONAL SUMMARY

Software Development Engineer with 4 years of experience designing and scaling distributed backend systems for high-traffic products.

SKILLS

- Java, C++, Python
- Data Structures & Algorithms
- System design (distributed systems)
- Microservices architecture
- SQL & NoSQL databases (MySQL, Cassandra)
- Kafka, RabbitMQ (messaging)
- AWS, Docker, Kubernetes
- Object-oriented design principles

WORK EXPERIENCE

Software Development Engineer II — Skyline Technologies

Jul 2022 - Present

- Designed and implemented a notification microservice handling 5M+ events/day with 99.95% uptime
- Reduced API latency by 45% by introducing caching layers using Redis
- Led migration of a monolithic order-processing service into 4 independently deployable microservices
- Mentored 2 junior engineers and conducted code reviews to maintain engineering standards

Software Development Engineer I — Orbit Software Labs

Jun 2020 - Jun 2022

- Built core features for a logistics tracking platform used by 10,000+ drivers
- Optimized database queries reducing report generation time from 12s to 2s
- Participated in on-call rotation, resolving production incidents within SLA

PROJECTS

Distributed URL Shortener

Designed a horizontally scalable URL shortening service with consistent hashing and Redis caching

Real-time Chat System

Built a WebSocket-based chat backend supporting group messaging and message persistence

EDUCATION

B.Tech, Computer Science — IIIT Hyderabad

2016 - 2020

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- LeetCode - 500+ problems solved
