

Rahul Bose

Android App Developer

Kolkata, India | +91 89012 34567 | rahul.bose.android@gmail.com | linkedin.com/in/rahulbose-android

PROFESSIONAL SUMMARY

Android Developer skilled in Kotlin and Jetpack libraries, building robust apps with clean architecture and strong test coverage.

SKILLS

- Kotlin, Java
- Android Jetpack (ViewModel, LiveData, Room)
- MVVM & Clean Architecture
- Retrofit, Coroutines
- SQLite, Room database
- Unit testing (JUnit, Espresso)
- Git, Gradle build systems
- Play Console & app release management

WORK EXPERIENCE

Android Developer — Bytecraft Mobile Solutions

Mar 2022 - Present

- Maintained and enhanced a banking app with 1M+ active users, ensuring PCI-DSS compliant data handling
- Migrated app architecture from MVP to MVVM, reducing bug reports related to state management by 40%
- Implemented offline-first functionality using Room database, improving app usability in low-connectivity areas
- Wrote unit and UI tests increasing code coverage from 35% to 75%

Android Developer Intern — TechNova Apps

Jan 2021 - Feb 2022

- Built UI components and fixed layout issues across various Android screen sizes
- Assisted senior developers in integrating REST APIs using Retrofit

PROJECTS

Expense Splitter App

Kotlin app for splitting group expenses with Room database for offline storage

Weather Forecast App

Android app using Retrofit to fetch weather data with clean MVVM architecture

EDUCATION

B.Tech, Information Technology — Jadavpur University

2017 - 2021

CERTIFICATIONS

- Google - Android Developer Nanodegree (Udacity)
- Kotlin Bootcamp for Programmers
